# [ ABOUT US ]

With more than 21 years of experience, ECO//SUN Ltd is a pioneer company in the renewable energy sector, contributing to a cleaner energy supply worldwide.

As a comprehensive solutions provider for residential through utility-scale projects, ECO//SUN main object is researching, designing, marketing, distributing of systems for residential or industrial applications such as:

What we offer:

ECO//SUN, having more than 150 points of sale throughout Greece, offers:

Design and construction of systems

Operation support and monitoring

Upgrades and modifications

Hybrid energy solutions

Automation

All these are supported by:

- > Knowledge and experience
- > High qualified personnel and partners
- > 24-hour technical support and service
- > Spare parts and stock availability
- > Annual maintenance contracts
- > Security systems and monitoring
- > Flexible financing programs

Our aim is that the development and organization we have achieved will grow further, enabling us to reach to the top of the field of renewable energy sources

It is a one-stop source for Renewable Energy technology, empowering our partners to succeed!

# [ PRODUCTS ]

- > Solar Modules
- > Inverters
- > Charge Controllers
- > Battery Chargers
- > Batteries
- > Power Generators
- > Mounting Systems
- > Water Processing System
- > Heat Pumps
- > Electric

# [ CERTIFICATIONS ]

ECO//SUN has been awarded with an ISO 9001, ISO 14001 and OHSAS 18001 certifications by TUV AUSTRIA.

# [ WHY US ]

In a very competitive environment in renewable energy sector, ECO//SUN provides an ideal solution for our partners! As a one-stop shop, our partners will benefit from:

## EXPERIENCE

21 years of experience, with more than 10.000 successful domestic & international projects

## SUPPORT

We provide 24/7 technical support  
Service and equipment installation  
Project finance

## VALUE

Best Value for money  
Certified products designed by ECO//SUN

## STOCK

All our products are in Stock

## FAST SHIPMENT

We ship next day

# [ SERVICES ]

---

## CUTTING-EDGE RESEARCH & DESIGN OF ENERGY SYSTEMS

Exceptional design and proper installation are necessary in order to ensure that the power generation unit operates smoothly both in terms of safety and efficient energy use. ECO//SUN, pioneering in the renewable energy sources field, has developed its own certified departments of research and design of energy systems staffed by experienced engineers.

After analyzing the needs and wants of the customer, the research and design department of ECO//SUN will submit the proposals that meet his requirements. The parameters taken into consideration, such as building facilities, geographical location and, of course, the customer's needs vary in each case.

In order to create and install an effective photovoltaic system that meets the requirements of the customer, a thorough research and exceptional design are of vital importance.

---

## 24/7 TECHNICAL SUPPORT

---

It is very uncommon for ECO//SUN systems to present any type of malfunctions. Having completed more than 10.000 projects, ECO//SUN has developed real expertise and gained so much experience in the field that there is no room for errors or faulty equipment. Being a certified company at all levels, our after-sales department is essential in order to offer technical assistance to our clients 24 hours per day, 7 days per week. Our highly educated and scientifically qualified personnel is constantly attending training seminars in order to be able to deal with any kind of emergency that may come up. From the very beginning of the installation process, i.e. the first screw, and throughout the duration of the contract and risk coverage period, ECO//SUN's certified and experienced after-sales department team is always available for our clients and fully prepared to deal with any possible scenario.

---

## MAINTENANCE CONTRACTS & ALL RISKS COVERAGE

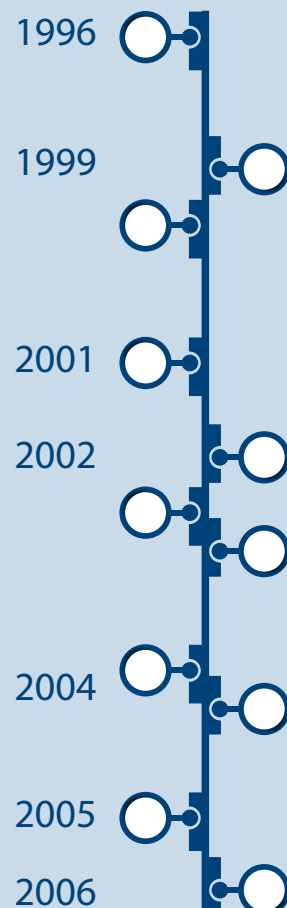

---

One of the most important services offered by ECO//SUN is our maintenance contracts and all risks coverage for every renewable energy system installed. Maintenance contracts are for one year and include preventive maintenance costs, as well as any repairs required for as long as the contract is valid. However, it is possible to adjust them in order to meet our customer's needs.

Regarding all risks coverage, ECO//SUN covers any unforeseen and sudden property damage or loss due to: fire, thunderbolt, explosion, flood, storm, snow, rain, hail, frost, earthquake, subsidence or any other damage caused by natural phenomena, short-circuit (damage in the equipment), hypertension or induced current.

# [ MILESTONES ]

- 
- 1996 It is founded as a sole proprietorship company with its headquarters located in Thessaloniki and starts developing its enterprising activities in remote and inaccessible areas, as well as in Mount Athos, building power systems based on renewable energy sources.
- 1999 Builds an innovative lighting system in a park, set in Alexadroupolis, using photovoltaics. In the same year, ECO//SUN installs on Crete the largest photovoltaic panel at that time, producing power of 125kWp. In collaboration, among others, with the Technological Educational Institution of Western Macedonia, located in Kozani, IEK Omiros, the University of Munich, and Dillingen Academy, ECO//SUN participates in "Leonardo Da Vinci" educational program and creates the syllabus for the courses of the profession of the Solar Technician.
- 2001 A technical support department is created to provide assistance to customers, service of inverters, design and manufacture of electrical switch boards and automation for energy systems.
- 2002 The company, having expanded its work field, changes and turns from a sole proprietorship company to an E.P.E. entity (the Greek equivalent to «Ltd.»).  
A design and manufacturing department for mounting systems is created.  
ECO//SUN becomes a co-founder of the Hellenic Association of Photovoltaic Companies, a manufacturers' association that contributes to the creation and development of a healthy and sustainable market that promotes photovoltaic energy systems.
- 2004 Participates in the installation of the PV at the «Eleftherios Venizelos» airport of Athens.  
Participates in a 40kW project that was part of the Olympic Games, an PV installation at the German School of Athens, where the German journalists covering the Games were staying at.
- 2005 Member of the SY.DE.SYS association ( battery recycling )
- 2006 Development of mounting systems, which are the company's first inhouse production products

2007		The company expands by setting up a branch in Athens.
2008		First grid connected PV systems according to a F.I.T. law in Greece
2009		Transfer of the logistics department to Lakkoma, in privately owned facilities of 600 s.m. Development of a production unit for the manufacturing of modern aluminum mounting systems and other special mounting and construction systems
2010		Awarded an ISO 9001 certification by TUV Rheinland.
2011		A new certification for the company that was awarded an ISO 14001 and an OHSA18001 certification by TUV Intercert. ECO//SUN mounting systems certification by TUV Austria.
2012		Warehouse & manufacturing facilities are being upgraded and expanded. Additional storage area expansion of 2.000 m <sup>2</sup> Participation in a research program, as part of the «Cooperation 2011» project, about an energy autonomous smart greenhouse in the «Brite Greenhouse» project
2013		Became a contracted member of the European recycling association PV CYCLE. Participation in a project about the development of a hybrid photovoltaic park and wind turbines in the Sahara Desert, near Alexandria, Egypt. The project played a major role in the development of flora in the area.
2014		Launch of the ECO//SUN brand, starting with the production of high performance photovoltaic modules Certification of the photovoltaic modules by Kiwa
2015		Expansion of the ECO//SUN branded product range by including batteries and inverters Cooperation with the company LEROY MERLIN, a French headquartered home improvement, gardening and D.I.Y. retailer, serving several countries in Europe, Russia, Asia, South America and Africa Chosen by Greenpeace as a supplier for its crowdfunded solar campaign for families in need, on the island of Rhodes.
2016		With more than 20 years of presence, ECO//SUN has created a wide partner network throughout Greece, sharing its expertise and offering the highest level of services. Cooperation with Diathermiki, a network of more that 150 stores all over Greece, specialized in the energy sector
2017		The company is expanding its activities in the electric vehicle market. The ecocar, company's first electric vehicle, was released in September 2017.
2018		The company's family of electric vehicles is expanding with new ones commercial vehicles, ecocar pick up & ecocar van

A glowing lightbulb is the central focus, with a warm, golden light emanating from it. Above the bulb, a horizontal line of small, white, zigzag shapes stretches across the frame. The background is a soft, out-of-focus bokeh of light and dark spots, suggesting an indoor setting with other lights. A large, light-colored diagonal shape cuts across the left side of the image, providing a space for text.
